## WHAT'S THE VALUE?

EnerSmart solution clients have seen an average increase in revenue of 6% annually, and an estimated internal rate of return of ~300% over 5 years and have been able to avoid significant penalties related to congestion by better aligning the amount of energy offered into the hub to respect transmission limits.

In just 4 weeks be on your way to realizing;

## 4 Wk Assessment

Selling electricity in energy markets is complex and can leave you open to ESG and Compliance risk. It often involves many generation stations in connected networks, leading to a complicated set of operational decisions that must be made on a daily basis. What if you could automatically generate the optimal set of decisions for operating your energy assets? EnerSmart's custom AI framework constructed on Azure uses a combination of advanced forecasting techniques and mathematical optimizers to allow you to do just that, resulting in increased revenue and lowered ESG and compliance risk.
