and video in MS
Teams

Communicate

Improve your
business processes by
analyzing & using the
data

Comply

Secure your processes
to attest

CyberTwice, is a Dutch ISV (Independent Software Vendor) developing and delivering Azure-based applications, which make surveillance & communications streams (audio and video) available and usable in Microsoft Teams. Allowing organizations around the globe to **Capture**, **Control**, and use (**Communicate**) these streams to optimize their business processes whilst ensuring compliance (**Comply**).

Save & Simple

Our Background

Microsoft
Partner

- 2004 – 2011: CyberTech, global supplier of high-end voice recording systems for:
 - Financial Services organisations (#2 worldwide, 50% of Top-100 Global Financials use (using) CyberTech Recording)
 - Public Safety sector, Blue Light, Oil & Gas, Air Traffic Control, TETRA Mission Critical Comms
 - Deployments in 50 countries. Competition: Nice, Verint
- (2011) CyberTech acquired by NICE
- (2014+) **CyberTwice established**, developed & deployed Cloud Based Mobile Voice Recording for EU MiFID II Compliance @ KPN NL:
 - SaaS for Tier 1 Financials in NL with EU MiFID II record keeping obligation
 - Integration with Core Mobile Network (IMS)
 - Carrier Grade, Geo-Redundant, Multi-Tenant, long term cloud storage, call retention management, playback system, per call strong encryption (FIPS L2 netHSM)
 - Extensions: Mobile Presence and Fixed Mobile CLI (native dialler)

Our Background

Microsoft
Partner

- (2019) start developing **ATTEST and ATTEST Replay**
 - SaaS application for Compliance Recording and Enterprise Surveillance
 - Starting point: (Compliance) Collaboration recording for Microsoft Teams conversations (audio, video, shared screen content)
- (2021) launched **CyberGate**
 - SaaS application for Access Control (available as transactable offer on Azure Marketplace and Microsoft Appsource)
 - Connect SIP Video (Intercom, camera, bodycam) for Access Control and security to Microsoft Teams - **with 2-way audio and live video** - to the Teams user.
 - Centralized compliant recording of voice, video, meetings, shared content etc.
- (2023) Top Tier Microsoft ISV partner, frontrunner in selling and delivering transactable SaaS through Microsoft's Digital Marketplaces globally.

Challenge

- Is your organization migrating from a SIP based phone system / PBX to Microsoft Teams and you need to connect your existing SIP video door intercom or IP Paging system to Teams?
- Already using Microsoft Teams and would like to integrate a video door intercom, IP Paging or IP Camera's ?
- Using an SIP video door intercom, IP Paging system or IP Camera's with a proprietary application to manage, but a desire to use a fully integrated service with Microsoft Teams ?

What is CyberGate ?

Microsoft
Partner

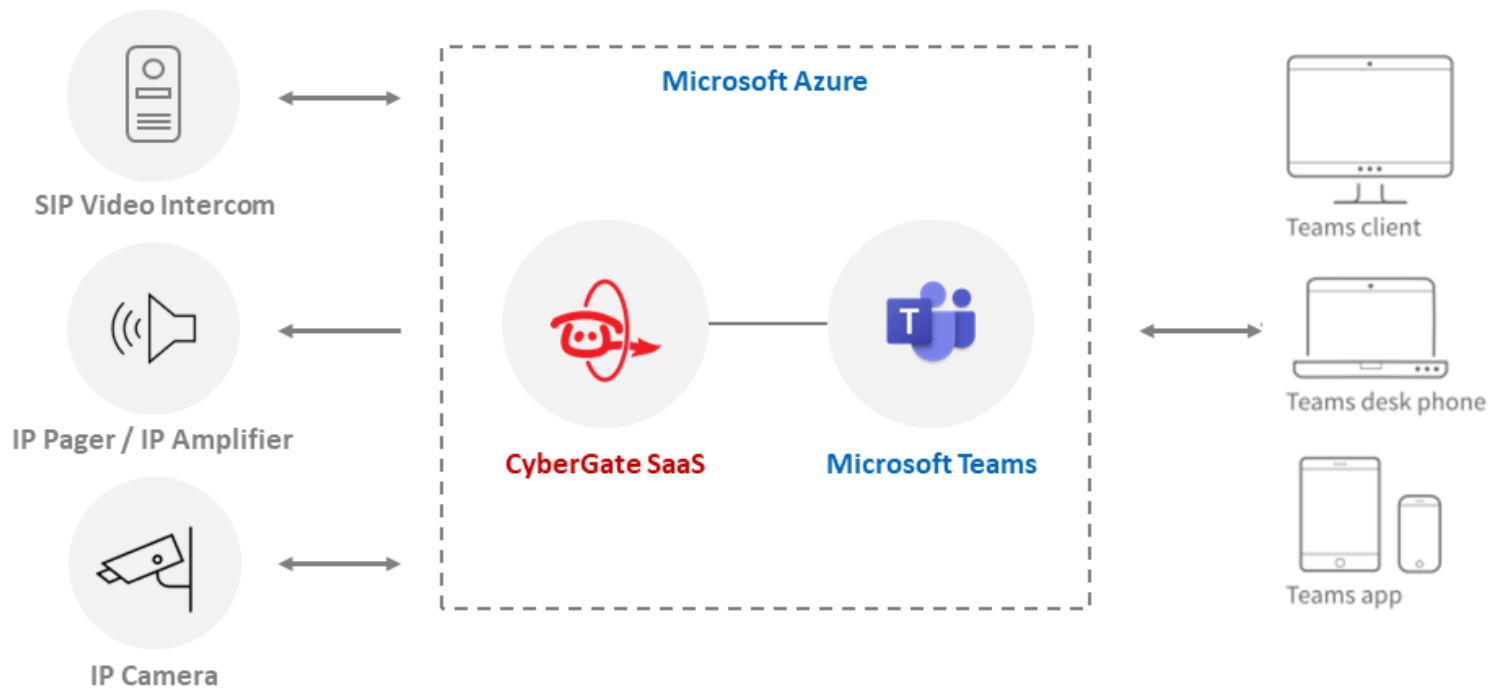

- ✈ A subscription-based Software-as-a-Service (SaaS) application hosted in Microsoft Azure (West-Europe)
- ✈ A simple solution to connect (SIP) Video Intercom, IP-Paging and / or IP-camera's to Microsoft Teams.
- ✈ Teams' users can:
 - answer incoming calls – with 2-way audio and live video – on their:
 - ✓ Desktop client
 - ✓ Desk phone
 - ✓ Smartphone App
 - open the door for visitors
- ✈ Centralized recording of video intercom calls and CCTV camera's
- ✈ Find more: <https://www.cybertwice.com/cybergate>
