

Azure Security Assessment

Safeguard your entire organization with Microsoft's solution

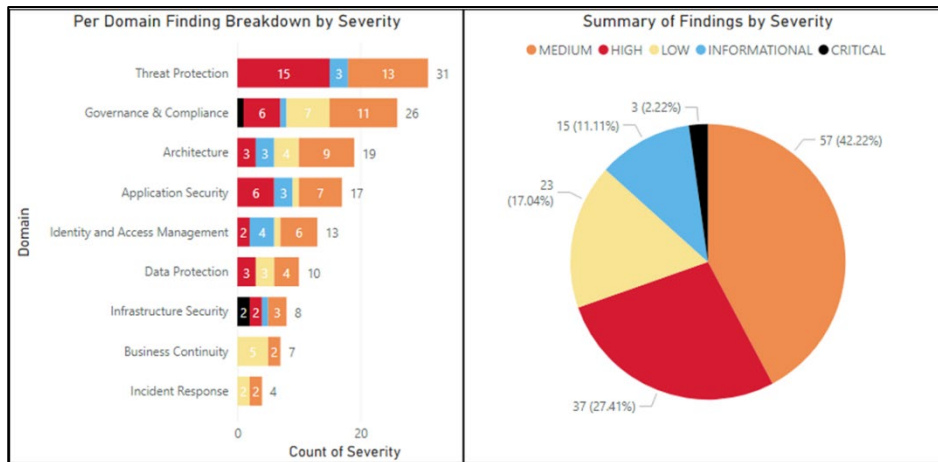

The Challenge

Security is of the upmost importance in our world's current climate. While many organizations recognize the need for a secure cloud environment, not many companies are actually fully secure. "The CSA finds that top threats still include identity and access management, insecure configurations and lack of cloud security architecture and strategy." (quote from Cloud Security Alliance's Top Threats to Cloud | CSA)

The Solution

Spyglass's 3-Week Azure Security Assessment captures your current security state and documents a plan to safeguard your entire organization with Microsoft's integrated security, compliance, and identity solutions built to work across the Azure platform.

The focus of the \$35k assessment is to determine specific configurations, architectures, and solutions that will increase return on investment from Azure native and integrated security capabilities for maximized security and compliance.

Agenda

- Console and Portal reviews to validate configurations
- Defining desired or future state objectives discussions
- Review common application patterns/architectures to understand security capabilities
- Recommendations

Deliverables

- Recommendations Document
- Remediation Roadmap
- Executive Summary Presentation

Aligned With:

- The Cloud Security Alliance (CSA) Cloud Controls Matrix (CCM)

Spyglass MTG Can Help!

We can help you safeguard your organization with Microsoft's Azure platform. Contact us today!

About Spyglass MTG- A Women Owned/Women Led Company

For over 15 years, we've closely partnered with Microsoft to bring their vast and expanding suite of enterprise solutions to clients—from better apps to powerful analytics to cloud flexibility. We can help you enhance, implement, integrate, support and procure your Microsoft products. You'll solve business problems and leverage the platform to increase maximum business productivity and results within your organization.
