Our passion is to serve the technology needs of organizations

who help and serve people and their communities.

Strategic Online Systems is a hybrid cloud computing company focused on delivering:

- The right Microsoft technology whether cloud, hybrid, or on-premises.
- Microsoft Azure Stack HCI compute and storage solutions for organizations of all types and sizes.
- Backup and Disaster Recovery Services for onsite, private cloud and public cloud implementations.
- Validated Intel Select Solutions for Microsoft Azure Stack HCI, SQL Server, and AI.
- CIO Consulting services for IT modernization, planning, strategy, budgeting, and individual initiatives.
- System Architecture services for data center architecture; vendor, equipment, and platform selection.
- Project Implementation and deployment services. We specialize in complex rollouts of client technology.
- Managed Service Provider services for data center, network, server, and client equipment. Our model allows us to manage resources remotely and therefore our services are available to companies regardless of location.
- Advanced replacement depot services covering thousands of servers, PCs, and laptops nationwide.
- Custom solutions for non-profit, healthcare, local government, and education.
